

Synopsis Of Differences in Scope Of Practice for Licensed Vocational,
Associate, Diploma and Baccalaureate Degree Nurses

Nursing Practice	LVN Scope of Practice <i>Directed/Supervised Role</i>	ADN or Diploma RN Scope of Practice <i>Independent Role</i>	BSN RN Scope of Practice <i>Independent Role</i>
Education	<p>The curriculum for the VN education is in a clinically intensive certificate program of approximately one year in length.</p> <p>The VN curriculum includes instruction in five basic areas of nursing care: adults; mothers and newborns; children; elderly; and individuals with mental health problems. Clinical experience in a unit or a facility specifically designed for psychiatric care is optional.</p> <p>Required support courses should provide instruction in biological, physical, social, behavioral, and nursing sciences, including body structure and function, microbiology, pharmacology, nutrition, signs of emotional health, human growth and development, vocational adjustments, and nursing skills.</p>	<p>ADN and Diploma programs require a minimum of two full years of study, integrating a balance between courses in liberal arts; natural, social, and behavioral sciences; and nursing. Academic associate degrees consist of 60-72 credit hours with approximately half the program requirements in nursing courses.</p> <p>The Texas BON approved curriculum includes requirements for didactic instruction and clinical experiences in four contents areas: medical-surgical, maternal/child health, pediatrics, geriatrics and mental health nursing.</p>	<p>The BSN program of study integrates approximately 60 hours from liberal arts and natural, social, and behavioral science courses and approximately 60-70 hours of nursing courses.</p> <p>In addition to the ADN/Diploma education requirements, BSN education must also include nursing courses which include didactic content and supervised clinical learning experiences, as appropriate, in the community, research, and leadership with preparation and skills to practice evidence-based nursing.</p>

Supervision	<p>Supervision is required for the LVN scope of practice. LVNs are not licensed for independent nursing practice.</p> <p>A LVN must ensure that he or she has an appropriate clinical supervisor, i.e. RN, APRN, Physician, PA, Dentist or Podiatrist. The proximity of a clinical supervisor depends on skills and competency of the LVN, patient conditions and practice setting. Direct, on-site supervision may not always be necessary depending on the LVN's skill and competence and should be determined on a case-by-case situation taking into consideration the practice setting laws. However, clinical supervisors must provide timely and readily available supervision and may have to be physically present to assist</p> <p>LVNs should emergent situations occur.</p>	<p>Provides supervision to other RNs, LVNs and UAPs. Supervision of LVN staff is defined as the process of directing, guiding, and influencing the outcome of an individual's performance and activity.</p>	<p>Provides supervision to other RNs, LVNs and UAPs. Setting	<p>Provides focused nursing care to individual patients with predictable health care needs under the direction of an appropriate clinical supervisor.</p> <p>The setting may include areas with well-defined policies, procedures and guidelines with assistance and support from appropriate clinical supervisors, i.e. nursing home, hospital, rehabilitation center, skilled nursing facility, clinic, or a private physician office. As competencies are demonstrated, if the LVN transitions to other settings, it is the LVN's responsibility to ensure he or she has an appropriate clinical supervisor and that the policies, procedures and guidelines for that particular setting are available to guide the LVN practice.</p>	<p>Provides independent, direct care to patients and their families who may be experiencing complex health care needs that may be related to multiple conditions.</p> <p>Provides healthcare to patients with predictable and unpredictable outcomes in various settings.</p>	<p>Provides independent, direct care to patients, families, populations, and communities experiencing complex health care needs that may be related to multiple conditions.</p> <p>Provides healthcare to patients with predictable and unpredictable outcomes in various settings.</p>

Assessment	<p>Assists, contributes and participates in the nursing process by performing a focused assessment on individual patients to collect data and gather information. A focused assessment is an appraisal of the situation at hand for an individual patient and may be performed prior to the RN's initial and comprehensive assessment.</p> <p>The LVN reports and documents the assessment information and changes in patient conditions to an appropriate clinical supervisor.</p>	<p>Independently performs an initial or ongoing comprehensive assessment (extensive data collection). Anticipates changes in patient conditions to include emergent situations. Reports and documents information and changes in patient conditions to a health care practitioner and/or a responsible party.</p> <p>Determines the physical and mental health status, needs, and preferences of culturally diverse patients and their families.</p>	<p>Independently performs an initial or ongoing comprehensive assessment (extensive data collection).
